EDUCATION

Bachelor of Computer Engineering

February 2026

Sharif University of Technology, International Campus, Kish Island, Iran

Thesis title: "Persian Text To Speech Language Model"

Advisor: Professor Amir Ali Ghafourian Ghahramani

RESEARCH INTERESTS

Deep learning architectures, reinforcement learning for clinical decision support, AI-assisted diagnosis.

RESEARCH EXPERIENCE

Undergraduate Researcher

Fall 2023

Department of Computer Engineering, Sharif University of Technology

- Recorded a 1,000-sample dataset using my own voice with transcriptions in Persian
- Preprocessed voices: text cleaner, voice cleaner, and phoneme cleaner using Python
- Developed different text-to-speech models: GlowTTS, Tacotron, and Tacotron 2 using Python.

* Related code available upon request

Undergraduate Researcher

June 2023

Department of Computer Engineering, Sharif University of Technology

- Labeled dental DICOM images using a dentist as a domain expert
- Preprocessed DICOM images to remove artifacts and shadow noise using Python
- Applied masks to images using Matplotlib and Python
- Created a Faster R-CNN model and dataset for model training using PyTorch, Torchvision, and Python libraries
- Extracted classified labels: Healthy Teeth, Implant Teeth, Endo Clean Teeth, Endo Surgery Teeth, and Background
- Developed a secondary MyEfficient deep learning model to classify images from the Faster R-CNN detector
- Built a pipeline that detects and classifies teeth requiring Endodontic Surgery

* Related code available upon request

Undergraduate Researcher

January 2023

Department of Computer Engineering, Sharif University of Technology

- Labeled eyes CT-Scan images using an ophthalmologist as a domain expert
- Preprocessed CT-Scan images to remove artifacts and shadow noise using Python
- Applied masks to images using Matplotlib and Python
- Created a Faster R-CNN model and dataset for model training using PyTorch, Torchvision, and Python libraries
- Extracted classified labels: Cataract and Healthy
- Developed a secondary Resnet deep learning model to classify images from the Faster R-CNN detector
- Built a pipeline that detects and classifies eyes with cataract illness

* Related code available upon request

WORK EXPERIENCE

Razhman Algorithm Hopad - Tehran, Iran | Full-Stack Software Engineer

February 2024 -
December 2025

- Soha Operational Dashboard - *Route tracer and IP extractor for given domains and services*
 - Designed and developed structures using microservice structures, Nest.js, Express.js and Node.js
 - Designed Database structure and caching system using MongoDB, Elasticsearch, and Redis
 - Developed Frontend Dashboard using React.js, TypeScript, Tailwind CSS, Framer Motion and Redux
- Jarian Analytics Dashboard - *Latency and performance analyzer for top internet service providers*
 - Designed and developed structures using microservice structures, Nest.js, Express.js and Node.js
 - Designed Database structure and caching system using Elasticsearch, and Redis
 - Developed Frontend Dashboard using Next.js, TypeScript, Tailwind CSS, Framer Motion and Redux

Dana Development and Value Chain Management Company - Remote, Iran | Internship

Fall 2023

- Official Website and Dashboard
 - Designed UI and UX of landing page and admin dashboard using Figma
 - Developed Backend and Database using Express.js, Node.js and MongoDB
 - Developed Frontend using React.js, JavaScript, Tailwind CSS and Framer Motion

CERTIFICATIONS

- Machine Learning | Stanford University (Coursera) | Online - 2020
- C++ Programming (Beginner & Advanced) | Score: 100/100 | University of Tehran, Iran - 2020
- Python Programming (Beginner & Advanced) | Score: 100/100 | University of Tehran, Iran - 2021
- IELTS Academic Certification | Score: 7/9 | 24/May/2026

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, HTML, CSS, C++
- **Frameworks & Libraries:** PyTorch, FastAPI, React.js, Next.js, Node.js, Express.js, Nest.js, Redux, Tailwind CSS, Framer Motion
- **Data & Algorithms:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Algorithm design, Map-reduce, Data reduction, Data aggregation, Debouncing
- **Databases & Tools:** MongoDB, Elasticsearch, Redis, RabbitMQ (beginner), Kafka (beginner)
- **UI/UX:** Figma, Adobe XD, UI design, UX principles
- **Version Control:** Git, GitHub, GitLab
- **Data Analysis:** Data analysis, statistical methods, data visualization

SOFT SKILLS

- **Problem Solving & Critical Thinking** - Debugging distributed systems, optimizing ML pipelines, evaluating architectural trade-offs
- **Teamwork & Collaboration** - Worked with dental domain experts, remote teams in Germany, and cross-functional developers
- **Agile Methodologies** - Scrum, sprint planning, daily standups, retrospectives
- **Communication** - Technical reporting to non-technical stakeholders (dentists, clinic administrators)

LANGUAGES

English: Proficient
Persian: Fluent
